

LEGEND

- 01 **New Park Style Skate Park**
Open park with a mixture of banks, hips, transitions, and obstacles including rails, curbs, ledges, stairs, etc. A stand alone mini-ramp is featured. The design of this new skate facility caters to beginners to intermediate users.
- 02 **New Pump Track**
New beginner to intermediate asphalt pump track featuring rollers and berms, caters for multi-wheel sports, including skateboarders, bikes riders, roller skaters, scooters, etc.
- 03 **Multi-sport Court**
A full size basketball court integrated with Volleyball and Netball line-markings and other games. The space features terrace seatings and shade, as well as rebound and climbing wall.
- 04 **Social Recreation Area**
The social recreation area acts as a connector flowing through the whole space. Featuring new customized social seating, shading, lounging spaces, and BBQ facilities.
- 05 **Lawn and Garden Beds**
Lawn spaces for informal gathering and recreation featuring shade, trees and native planting.
- 06 **Future Youth Centre Refurbishment Opportunities**
Future provision to Internal refurbishment and opportunity to open up internal space to the outside linking the Youth Centre internal activities with broader active zones subject to future design and funding.
- 07 **Youth Centre Social Area**
Future provision for shade shelters and seating including picnic seating as a forecourt to the Youth centre. Subject to future detail design and funding opportunities.
- 08 **Parkour / Climbing bars**
Active space providing climbing bars for parkour, fitness and gymnastics for young people to stay active

DESIGN DESCRIPTION

Altone Skate and Social Zone is a community park that integrates a new pump track, new skate park and multi-sport court that is linked by a flowing social spine featuring custom shelters, seating and playful recreation opportunities. The park takes visual inspiration from the Swan River, with the sweeping blues and purples reflecting the flowing river, and the shade structure emulate the natural reeds and the sky and clouds above.

A path network weaves between the main recreation areas and youth centre and is peppered with social nodes and provides access from the road all the way through to the car park.

The social recreation areas include social swings that provide a playful experience for young people to sit and hang-out on, whilst a large climbing bar area provides space for fitness, parkour or gymnastics. A BBQ area is provided centrally that allows for socialising and community to come together. whilst pockets of planting break up the paved areas with native planting and trees for additional natural shade and respite in the warm season.

The multi-sport court features netball and basketball rings, as well as opportunity for volleyball and other playful games. Terrace seating with shade shelter caters to large groups to spectate sports. The court also becomes a space for community events such as small concerts and performances with the integrated 3-phase power. A climbing wall with softfall rubber is located to one end of the court providing a bouldering experience.

The master plan is the broader vision for Altone park, with the full skate park, pump track as well as some shade shelters, seating, and paths to be delivered in 2025/26 financial year. Whilst the full vision for the space is to be realised in future stages subject to future funding.

Altone Skate and Social Recreation Zone Masterplan
